DEFINITION OF SPLITTING INTO SEMESTERS

A. The Academic Year consists of two semesters: Fall and Spring. The two semesters are divided into 21 weeks each, with the following exceptions:

2. The Fall Semester begins on the 21st of September.
3. The Spring Semester ends on the 21st of April.
4. The Fall Semester ends on the 21st of December.

B. The spring semester begins on the 21st of March.
C. The summer semester begins on the 21st of June.

D. The summer semester ends on the 21st of September.

E. The fall semester begins on the 21st of November.
F. The fall semester ends on the 21st of January.

G. The summer semester begins on the 21st of March.
H. The summer semester ends on the 21st of May.

I. The fall semester begins on the 21st of November.
J. The fall semester ends on the 21st of January.

K. The spring semester begins on the 21st of March.
L. The spring semester ends on the 21st of May.

M. The summer semester begins on the 21st of March.
N. The summer semester ends on the 21st of May.

O. The fall semester begins on the 21st of November.
P. The fall semester ends on the 21st of January.

Q. The spring semester begins on the 21st of March.
R. The spring semester ends on the 21st of May.

S. The summer semester begins on the 21st of March.
T. The summer semester ends on the 21st of May.

U. The fall semester begins on the 21st of November.
V. The fall semester ends on the 21st of January.

W. The spring semester begins on the 21st of March.
X. The spring semester ends on the 21st of May.

Y. The summer semester begins on the 21st of March.
Z. The summer semester ends on the 21st of May.

The Academic Year begins on the 21st of November.

The Academic Year ends on the 21st of June.
2.4 Introduction

The course offers advanced study in mathematics, focusing on the development of skills in analysis and problem-solving. The course is designed for students who have already completed the first year of undergraduate studies in mathematics and wish to deepen their understanding of the subject. It covers topics such as real analysis, complex analysis, and functional analysis, providing a solid foundation for further studies in mathematics.

The course is taught by experienced faculty members who are actively engaged in research. Students will have the opportunity to work on original research projects and to present their findings at conferences. The course also includes regular seminars and guest lectures, providing a dynamic and interactive learning environment.

The course is offered in both the morning and afternoon sessions, with a choice of modules to suit individual interests. Students are encouraged to participate in extracurricular activities, such as math clubs and problem-solving groups, to enhance their learning experience.

The course is taught in Hebrew and English, with translation available for non-Hebrew speakers. It is open to students from all backgrounds and levels of experience, with no prior knowledge assumed.

The course is available to all students who meet the prerequisites and are interested in pursuing advanced studies in mathematics.

The course is designed to provide a comprehensive understanding of advanced mathematical concepts and to prepare students for further studies in mathematics or related fields.
